

Thermoregulation Systems

ELECTRONIC CONTROL, COMPENSATORS

230 Vac, working temp 0°C to 50°C, IP40

EVO2F	24h programme with quartz clock	£420.00
EVO5M	5 day programme with digital timer	£420.00

COMPENSATOR WITH OPTIMISER

With remote management Regulation Curve broken into 4 temperatures. Weekly programming 3 daily time band. Digital clock with 5 year charge. The various parameters of the menu can be read and modified via telephone or GSM text messages.

EV80	230VAC 0 to 5°C IP40	£600.00
EV85	As EV80 but with digital version	£475.00
EV90	Master Control Unit	£590.00
	Slave EV91A Compensator module	£300.00
	Slave EV91B Hot-water module	£300.00
	Slave EV91C Boiler Cascade module	£300.00
	Slave EV91D Output module	£300.00
	Slave EV92 Digital Input module	£215.00

TEMPERATURE PROBES

Suitable for EV02F and EV05M

EC01	External	£30.00
EC02	Delivery Contact	£30.00
EC03	Delivery Immersion	£45.00

Suitable for EV80s and EV90s

EC14	External	£30.00
EC15	Delivery Contact	£30.00
EC16	Delivery Immersion	£45.00

Automatic Bypass Valve

ABV-22	22mm Compression	0.1 to 0.6 bar diff pressure	£14.00
--------	------------------	------------------------------	--------

Max pressure 3 bar. Max flow temperature 110°C

High capacity, up to 50 litres per minute

Locking: Once set, the valve can be locked in position by tightening the screw in the cap
